

Seating - on a higher level

ISRI® 6000/350 Mechanical Seat for Underground Mining Vehicles

Description

Experience the safety and comfort of the ISRI 6000/350.

The Rescuer Squab is a back rest design incorporating a cut out section and molded seat cushion and backrest with ventilation ribs. The ventilation and the shape of the backrest as well as the mechanical suspension allows underground miners to travel in comfort whilst wearing their rescuer backpacks.

Technical Data

- Mechanical suspension with a weight range from 50 to 130kg.
- T shaped backrest.
- Fixed angle backrest.
- Two seat belt fixing points.
- Available in right hand control.
- Molded backrest and cushion in durable polyurethane.

Accessories

- 2" retractable seat belt.
- Tether straps.
- Hardware.
- Swivel.

Suitable Applications

Please contact your ISRI® dealer for further details.

Safety Warning

When proposing to fit seats to mining and construction equipment ISRI strongly recommend that all installations conform to the relevant ISO standards. If you are unsure of the relevant standards specific to an installation you should seek advice from a suitably qualified person.

Failure to ensure that the installation conforms to applicable ISO standards may result in avoidable injuries to the occupants.
